Andres Leonardo Ospina Rios

Unity Developer | Software Engineer
LinkedIn | Portfolio
Bogotá D.C., Colombia

I am a Unity Developer in training and a master's student in Software Engineering, with knowledge in Unity, C#, object-oriented programming, web application development, databases, and automated testing. I am characterized by my logical thinking, problem-solving and attention to detail skills. I seek to contribute to video game development through the implementation of efficient game mechanics and systems, applying software engineering best practices and collaborating in the creation of quality interactive experiences.

EDUCATION

Universidad de los Andes, Bogotá, Colombia August,2025 – December, 2027.
Master of Science (MSc) in Software Engineering

Generation Colombia, Bogotá, Colombia September,2026 – December, 2026.
Junior Unity Developer

Universidad de los Andes, Bogotá, Colombia January,2020 – April,2025.
Biomedical Engineer

WORK HISTORY

Universidad de los Andes, Bogotá, Colombia July, 2025 – June, 2026.
Teaching Assistant

- Guided over 140 students in problem-solving, facilitating the understanding of concepts and the development of technical skills.
- Provided academic accompaniment and technical support to resolve doubts and overcome difficulties during course activities.
- Evaluated student progress, identifying learning difficulties and providing guidance to strengthen their academic performance.

SKILLS

- Unity | C# | POO | Coroutines | Prefabs | Tilemap | Animator | Physics 2D | Scene Management | Git/GitHub | Python | SQL|

PROJECTS

SpaceShips War 2d Game, Bogotá, Colombia September,2026 – October,2026.
Unity Developer

- Developed a 2D space combat video game using Unity and C#.
- Implemented 3 game mechanics and interaction systems to enhance gameplay.
- Applied C# programming to manage game behaviors and functionalities.

Hiker 2D Platformer Game, Bogotá, Colombia August,2026 – September,2026.
Unity Developer

- Developed a 2D platformer video game in Unity and C#, featuring three levels, enemies, coins, and traps.
- Implemented movement and interaction mechanics using Tilemap, animations, and Coroutines.
- Applied object-oriented programming and the Singleton pattern to organize the 3 game systems.

Languages

- English (B2)
- Spanish (native)
